Sheil Catholic Center Volunteer Group
Secure Walking Pathway Project Update - December 12-21, 2014

Thank you Sheil Catholic Center volunteer group! Your hard work and motivation this December helped build a secure walking pathway for the students in Cusmapa. The students, teachers, staff, parents and community were encouraged by all of your accomplishments and love the new walkways. The pathways were finished a week after you left and the education center is thrilled with the finished product. They are using it every day. It is a vast improvement, and will especially be useful in the rainy season. The students were excited to walk on it their first week back to school, the beginning of February, and one of our volunteer groups were able to play with the students with sidewalk chalk. Very inspiring!

Funds that were leftover from your project were used to purchase new sturdy shoes for all of the maintenance staff which will be a lot safer for them as well as comfortable. Daily, they were coming to work in flip flops and working on their feet all day long. They sure have a smile on their faces now.

Thank you again for your great efforts and dedication to building a needed walkway between education buildings. Fabretto staff, students and parents will now be safer in their community.

THANK YOU!
